1 RESPONSIBLE AND RESILIENT INCOME

Past performance is not a guarantee or a reliable indicator of future results. Performance is for the PIMCO GIS Income Fund Institutional USD Income share class after fees which incepted on 30 November 2012. * Values indicated for each monthly dividend payout are based on a hypothetical US\$1 million investment.

Past distributions are not necessarily indicative of future trends, which may be lower. A positive distribution yield does not imply a positive return. Data does not include special cash dividends. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund be made out of either income and/or capital of the Fund. In the case of the Fund and the Income II Shares, the Fund may at its discretion pay dividends out of capital and charge management fees to capital, thereby resulting in an increase in distributable income available for payment of dividends by the Fund/Income II Shares and therefore, the Fund/Income II shares may effectively pay dividends out of capital. In the case of Income II Shares, the Fund may also charge other fees to capital and also take into account the yield differential arising from share class currency hedging (which constitutes a distribution from capital). This may result in an immediate reduction of the NAV per share for the Fund and the Income II Shares. Please refer to <http://www.pimco.com.sg/en-sg> for more information on income statistics. Past performance is not indicative of future performance and no guarantee is being made that similar returns will be achieved in the future. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and on the assumption that dividends are reinvested, as applicable. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations. It does not take into account the effect of taxes.

2 EMPHASIS ON CAPITAL PRESERVATION

Uniquely **balances higher yielding and higher quality assets**, which perform differently in varying growth environments, to help weather the challenges of changing markets.

Allocate to high quality securities that should potentially perform well during an economic slowdown and higher yielding securities that should remain resilient even in negative economic scenarios.
