

Schroders Schroder China Asset Income Fund

A Accumulation HKD | Data as at 31.12.2022

Important Information

The fund invests primarily in Chinese equities and fixed income securities.

1. The fund is exposed to general investment risk, equity investment risk and risk relating to asset allocation strategy. The fund's asset allocation strategy may incur greater transaction costs and there is no assurance that such strategy will be successful.
 2. The fund investment in fixed income securities may be subject to credit and counterparty, credit rating risk, etc.. The fund investment in below investment grade and/or unrated debt securities may be subject to higher degree of the above risks.
 3. The fund invests in PRC and exposed to China market risk which may be subject to change in political, social and economic risk, liquidity and volatility risk, etc..
 4. The fund will invest substantially in Chinese equities and Chinese fixed income securities and is subject to concentration risk.
 5. The fund may invest in derivatives and subject to risks associated with derivatives.
 6. In respect of the distribution units, the manager will declare and pay monthly distributions. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the fund. Distribution may be paid from capital of the fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Investment Objectives

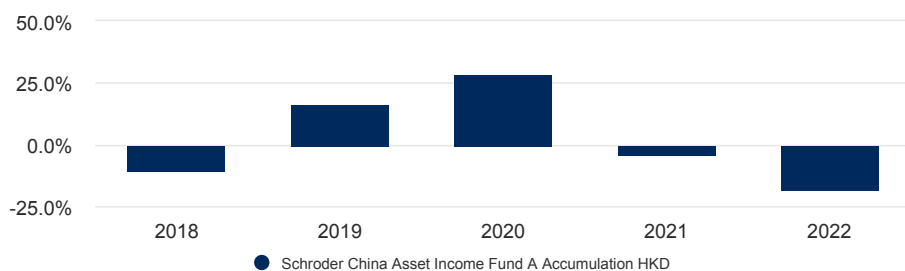

The fund's objective is to provide income and capital growth by investing primarily in Chinese equity and fixed income securities.

Risk statistics & financial ratios

| | Fund |
|----------------------------|------|
| Annual volatility (%) (3y) | 15.0 |

Source: Morningstar. The above ratios are based on NAV to NAV price based performance data.

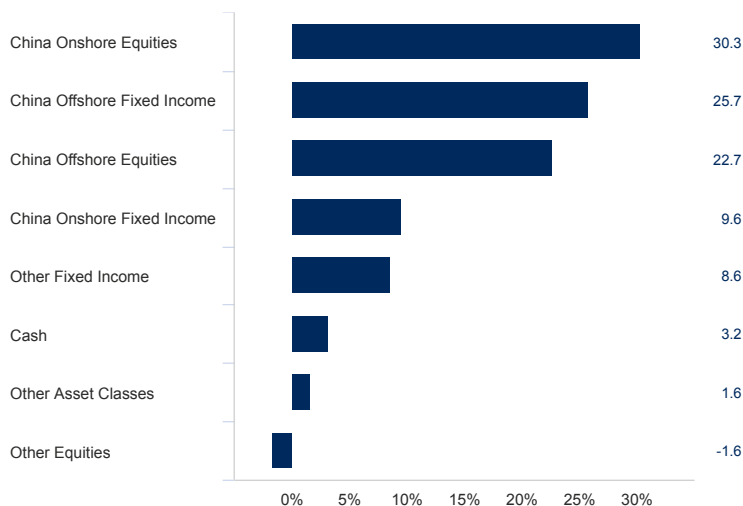

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated NAV to NAV (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.
